PROFESSIONAL SUMMARY

I am a reliable and detail-oriented Data Analyst and Statistician with comprehensive knowledge in statistical tools, data analysis, and data science. Proficient in Microsoft Excel (pivot tables, VLOOKUP/XLOOKUP, Power Query, data validation), Python, R, SQL, and Power BI, with hands-on experience cleaning, validating, and consolidating large datasets to produce actionable business insights. Demonstrates strong analytical and problem-solving abilities, with a proven track record of delivering automated reports, interactive dashboards, and data-driven recommendations to support operational and strategic decision-making. Seeking opportunities to leverage statistical and data expertise in a fast-paced business environment.

EDUCATIONAL BACKGROUND

BACHELOR OF SCIENCE IN STATISTICS

Jomo Kenyatta University of Agriculture and Technology (Juja, Kenya)

September 2019 – December 2023

- **Honors:** Second Class Lower Division
- **Project:** "Impact of inflation on the purchasing power of households in Kenya."

KENYA CERTIFICATE OF SECONDARY EDUCATION (KCSE)

St Joseph Rapogi High School (Migori, Kenya)

February 2015 – November 2018

- **Grade:** B+ (Plus)
- **Key Achievement:** Top 10% in Mathematics and Physics, active member of the Statistics Club.

PROFESSIONAL CERTIFICATIONS & SHORT COURSES

DATA SCIENCE COURSE

ALX Africa

May 2023 – September 2024

- Gained practical experience in Python, SQL, AWS, and Excel, with a focus on data visualization, machine learning, and big data analytics for real-world problem solving.
- **Project:** Maji Ndogo Water Project; "An analytical initiative focusing on water access

and demographics, examining various water sources, their usage, and quality to inform resource allocation and improve water management in the fictional Maji Ndogo area."

INEQUALITY ANALYSIS USING STATA: DISAGGREGATED DATA FROM SURVEYS

World Health Organization

April 2024 – June 2024

- Acquired skills in using Stata for analyzing socioeconomic inequalities, focusing on health indicators.

INTERNATIONAL COMPUTER DRIVING LICENSE (ICDL)

Institute of Advanced Technology (IAT) Buruburu, Nairobi, Kenya

January 2019 – April 2019

- Proficient in MS Office (Excel, Word, PowerPoint), Internet, and Email applications.

MIT MicroMasters in Statistics and Data Science (Methods Track)

Massachusetts Institute of Technology (MIT) – edX

- Coursework includes:
 - Machine Learning with Python: From Linear Models to Deep Learning
 - Fundamentals of Statistics
 - Learning Time Series with Interventions
- Emphasis on statistical modelling for decision-making, forecasting and trend analysis, and generating data-driven business insights to support strategic planning and performance improvement.

WORK EXPERIENCE

KENYA NATIONAL BUREAU OF STATISTICS (KNBS)

Industrial Attachment - Labor Statistics Department

January 2023 – April 2023

- **Data Entry and Cleaning:** Efficiently managed data entry tasks using MS Excel and R, ensuring accuracy in large datasets collected from national labor surveys.
- **Data Analysis:** Supported preparation of official labour statistics reports by conducting data analysis, validating indicators, and summarizing trends for management review in the labor market industry.

- **Research Support:** Collaborated with senior statisticians to provide research support, including literature review and data interpretation.
- **Report Preparation:** Contributed to the compilation of comprehensive reports, summarizing key findings and statistical trends in labor statistics.
- **Data Quality Checks:** Performed data validation and quality assurance checks to ensure accuracy and integrity of survey indicators used in national reporting.
- **Tools used:** MS Excel, R, Stata

CENSUS RESEARCH SOLUTIONS

Data Scientist mentee

January 2024 – Current

- **Data Cleaning & Preparation:** Cleaned and prepared raw survey datasets by handling missing values, correcting inconsistencies, and validating data quality using R and Excel, ensuring accuracy for downstream analysis.
- **Survey Analysis in R:** Utilized multiple R survey packages to manage, analyze, and summarize complex survey data, producing weighted estimates and actionable insights for reporting.
- **Automated Word Reporting in R:** Built reproducible reporting workflows in R to auto-generate professionally formatted Microsoft Word documents, reducing manual reporting time significantly.
- **Statistical Reporting & Tables:** Designed structured tables, summaries, and analytical outputs in R and Excel for inclusion in formal reports and client presentations.
- **LaTeX Typesetting:** Produced high-quality technical documents using LaTeX for professional and academic reporting.
- **Automated Powerpoint slides generation in R:** Automated creation of PowerPoint presentations from R analyses by generating ggplot2 visualizations and exporting them directly into slide decks, improving reporting efficiency and consistency.
- **Tools used:** R, Microsoft Excel, LaTeX, Microsoft Word

OFFICE OF THE HIGHER COMMISSIONER OF HUMAN RIGHTS(OHCHR)

Data Science Intern

March 2025- October 2025

- **Web Scraping & Data Collection:** Collected and processed data from diverse online sources using BeautifulSoup and Selenium within Microsoft Fabric and local environments, enabling efficient large-scale data extraction for analysis and reporting.
- **End-to-End Data Product Development:** Led the full development lifecycle of several high-impact data products, including the UPR Flash Report for the Universal Periodic Review Branch — a key deliverable used to present strategic insights to UN member states and demonstrate branch value at an international level.
- **Data Lifecycle Management:** Worked across all stages of the data lifecycle — ingestion, normalization, quality control, and access provisioning — ensuring datasets were reliable and ready for use in core decision-making products.
- **Automated Data Pipelines:** Built and maintained automated Python pipelines for data preprocessing and model training workflows, improving processing efficiency and reproducibility.
- **Dashboards & Monitoring:** Developed and maintained monitoring dashboards using Power BI and Microsoft Fabric to support ongoing reporting and operational visibility.
- **Stakeholder Support:** Provided technical guidance and data interpretation support to colleagues across teams, improving data literacy and tool adoption within the unit.
- **Tools used:** Python, Power BI, Microsoft Fabric, BeautifulSoup, Selenium, SQL

TECHNICAL SKILLS

- **Statistical Software:** R, Stata SE, SAS, SPSS, Python.
- **Programming Languages:** C++, SQL (MySQL, PostgreSQL)
- **Microsoft Office & Productivity:** Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Conditional Formatting, Data Validation, Macros), Word, PowerPoint
- **Business Intelligence & Data Platforms:** Power BI (dashboard development, DAX, data modeling), Microsoft Fabric.
- **Document Typesetting:** LaTeX
- **Web Scraping & Automation:** BeautifulSoup, Selenium, Scrapy, Playwright
- **Natural Language Processing & GenAI:** BERT, DistilBERT, Hugging Face Transformers
- **Operating Systems:** Windows.

- **Project Management:** Agile methodology, Microsoft Project
- **Big Data & Cloud Tools:** Databricks (learning), PySpark (basic), AWS

CORE COMPETENCIES

- **Analytical Skills:** Proficient in data review and analysis, with the ability to draw meaningful conclusions and provide actionable insights.
- **Communication:** Strong written and oral communication skills, with experience in presenting findings to diverse audiences.
- **Data Cleaning and Preparation:** Expertise in data mining, data wrangling, and cleaning using R and Python.
- **Time Management:** Effective at managing multiple projects and meeting deadlines in fast-paced environments.
- **Teamwork and Leadership:** Demonstrates a strong commitment to teamwork, with experience leading project teams and mentoring junior analysts.
- **Agile Development:** Experience with backlog management, iterative model improvements, and A/B testing.
- **Model Development & Evaluation:** Training, fine-tuning, and evaluating ML/NLP models using metrics such as accuracy, F1-score, and recall.

RESEARCH PROJECTS

- **Impact of Inflation on the Purchasing Power of Households in Kenya (Undergraduate Project):** Analyzed the effect of inflation on household purchasing power using national survey and economic data. Applied logistic regression models in Python to examine relationships between inflation rates and household expenditure across food, housing, and transportation categories. Used QGIS for regional mapping and Power BI to build interactive dashboards, delivering clear visual insights into socioeconomic challenges under rising inflation.
- **Maji Ndogo Project (ALX Africa Capstone):** Analyzed water access and demographics across the fictional Maji Ndogo community. Cleaned and integrated datasets on water sources, population served, and pollution indicators using Python and SQL (MySQL). Applied statistical and machine learning techniques to identify underserved regions and prioritize infrastructure repairs. Built Power BI dashboards and pivot tables to communicate

data-driven recommendations for equitable water resource allocation.

- **ML Text Classification Project** – Built and optimized BERT and DistilBERT models for multi-theme text classification, training iteratively up to 50 epochs and selecting the best-performing model based on accuracy and F1-score per theme. Improved model performance through systematic data cleaning and hyperparameter tuning.
